Yousef Zedan

Ţahţā, Sohag, Egypt zedstudios.devs@gmail.com +201130765715 in/yousef-zedan-6a275a400 yzportfolio.vercel.app/

SUMMARY

Creative Developer skilled in React, GSAP, Zustand, and Tailwind. Certified in CS50x and JavaScript. Built high-performance, accessible web apps with a focus on SEO, and modern UI/UX. Experienced in complex state management.

PROJECT

ZPortfolio

ZedStudios • yzportfolio.vercel.app/ • April 2026 - April 2026

- **Advanced Physics-Based UI:** Engineered a high-fidelity **macOS Dock** using **GSAP**, implementing exponential decay algorithms (e-d2) to achieve a seamless "Fisheye" magnification effect, maintaining a consistent **60 FPS** even during heavy multi-window interactions.
- **Scalable State Architecture:** Architected a centralized window management system using **Zustand**, reducing prop-drilling by **100%** and enabling simultaneous state tracking (position, focus-depth, and visibility) for **5+ concurrent application windows**.
- **Proximity-Based Micro-interactions:** Developed a custom "Welcome" interface with **Variable Font Weight** animations, utilizing mouse-tracking logic to dynamically adjust typography weight between **100 and 900** based on real-time cursor coordinates.
- **Code Reusability & Patterns:** Reduced code duplication by **40%** by implementing a **Higher-Order Component (HOC)** `WindowWrapper`, which standardizes Draggable functionality, Z-index layering, and window-control logic across all desktop applications.
- **Data-Driven Terminal Emulator:** Built a custom Terminal component with **Nerd Font** integration, achieving a **6ms render time** for complex tech-stack visualizations and providing an interactive **CLI-style** overview of technical competencies.
- **Asset Performance Optimization:** Optimized the delivery of high-resolution assets (PDFs & Wallpapers) using **PDF.js worker threads** and **Lazy Loading**, resulting in a **30% faster** Time to Interactive (TTI) for a resource-heavy desktop environment.

ZCinema

ZedStudios • z-cinema.vercel.app/ • April 2026 - April 2026

- Developed a high-performance, responsive movie discovery platform using **React 19** and **Vite**, integrating the **TMDB API** to provide real-time data on thousands of films. Optimized the application to achieve a **100 Lighthouse score** in SEO and Best Practices.
- **Performance Optimization:** Engineered a sub-4s **Largest Contentful Paint (LCP)** and reduced **Cumulative Layout Shift (CLS)** to **0.004** by implementing modern image formats (WebP), asset compression, and strategic CSS layout stability.
- **Backend Integration:** Leveraged **Appwrite** as a Backend-as-a-Service (BaaS) to build a dynamic "Trending" system, utilizing NoSQL databases to track and display real-time user search trends.
- **State & Data Management:** Implemented custom hooks and advanced **Debouncing** techniques to optimize API polling, reducing redundant network requests by **60%** during user searches.
- **Modern UI/UX:** Crafted a sleek, dark-themed interface using **Tailwind CSS**, focusing on mobile-first design and accessibility standards.

CERTIFICATIONS

Responsive Web Design (Double Certified: Legacy & New)

freeCodeCamp • 2026

- Certified expertise in crafting high-performance, mobile-first web interfaces. Mastered advanced CSS architectures (Flexbox, Grid), Typography, and UI Design Principles. Demonstrated a strong commitment to Web Accessibility (A11y) standards and SEO-friendly semantic HTML, ensuring seamless user experiences across all device categories and screen sizes.

JavaScript Algorithms and Data Structures

freeCodeCamp • 2026

- Certified in advanced JavaScript (ES6+) and programmatic problem-solving. Mastered core concepts including Functional Programming, Object-Oriented Programming (OOP), and Regular Expressions. Successfully completed 300+ hours of rigorous coding challenges and built complex algorithmic scripts to manipulate data structures, ensuring the ability to write scalable, bug-free logic for modern JS/ React applications.

CS50x: Introduction to Computer Science

Harvard University (via edX) • 2025

- Mastered core computer science fundamentals including C, Memory Management, and Data Structures. This rigorous foundation allows me to write highly optimized JavaScript/React code, manage complex state logic, and understand the low-level performance of web applications.

SKILLS

Front-End: HTML, CSS, JS, React, Tailwind CSS

Languages: C, Python, BASH

Back-End(BaaS): Appwrite

Creative: GSAP, Blender, Davinci Resolve, CapCut

Env & Editore: Arch Linux, Hyprland, Neovim, Ghostty

Art: Traditional Drawing, Digital Drawing, FL Studio

(Learning): TS, Next.js, React Native

(Planned): Three.js, WebGL, WebGPU
